

MM-care

Our software enables hospitals to automate medical coding along the reimbursement process.

MINDS medical is the first company in Germany to automate the coding of diagnoses from patient files using artificial intelligence. Using historical data, a database is created to identify documented diseases and treatments from the context of the case file. All diseases are displayed as ICD-10 and OPS codes.

The advantages of MM-care

40-60% of cases automatically coded

Higher documentation quality

30% cost savings

Revenue secure coding

Data protection guaranteed

What makes our AI special?

- ✓ self-learning and automatic adaptation
- ✓ seamless integration into the software landscape
- ✓ assistance system
- ✓ digitized processes
- ✓ data-based decisions
- ✓ traceable results

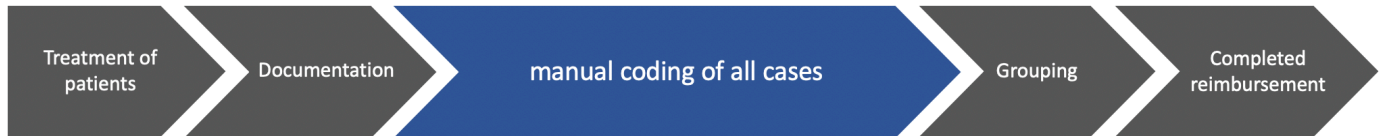

ICD is the International Classification of Diseases and Related Problems of the World Health Organization (WHO).

OPS stands for Operation and Procedure Keys. OPS is used to encode operational procedures in hospitals.
